SMART AND SUCCESSFUL - TAIWAN EXCELLENCE PRESS CONFERENCE AT AMB 2022 ON HIGH-PERFORMANCE PRODUCTS FROM TAIWAN'S METALWORKING INDUSTRY

The big names of the metalworking industry meet at AMB. This year, Taiwan Excellence was there to showcase Taiwan's ambitious and smart machinery industry to the trade audience.

Taiwan's government honors and strongly supports the symbol of Taiwan Excellence in its machine tool and machinery industries. At the press conference, Taiwan Excellence introduced Taiwan's three strongest manufacturers that are catering to the burgeoning demand for Industry 4.0 and automation.

The "secret" to Taiwan's smart industry success is located in the Greater Taichung area in the middle of Taiwan. This area is home to "the world's only machine tool and component industry cluster" and "enables global companies to meet all their needs in one convenient location," said Mr. Ching-Yun Huang, the Director of the Economic Division at Frankfurt/M Office, Taipei Representative Office in the Federal Republic of Germany, in his welcome remarks at the press conference at AMB 2022.

The first smart manufacturer, AXILE, aims to help manufacturers implement fully automated production lines, avoid unannounced shutdowns, and transform into smart factories. The European Sales & Marketing Manager of AXILE, Nicolas Budrino, explained how AXILE 5-axis machines are integrated with digitalized intelligent monitoring technology and automation to achieve 24/7 autonomous production without unplanned downtimes.

Yeong Chin Machinery (YCM) has a rich history of specializing in smart machine tool manufacturing through "lean" thinking, according to Giovanni Yueh, the YCM Sales Manager. YCM machine tools have been recognized worldwide due to their superior precision, outstanding rigidity, and exceptional reliability.

Joseph Chen, the Executive Vice President of Honor Seiki, discussed the company's main products of CNC vertical lathes, vertical turning centers, high-speed drilling centers, vertical grinding centers, and machining lines for the aerospace and automobile industries.

The product presentations were followed by an overview of Taiwan's industry by Stephanie Ho, a specialist at Taiwan Machine Tool & Accessories Builders' Association. As the world's fifth largest exporter of machine tools and components, Taiwan has averaged US\$4 billion in exports in recent years from a network of more than 1,000 precision machinery manufacturers and over 10,000 upstream suppliers. Although the global economy has suffered from various crises, Taiwan's machinery industry saw its annual production soar to a record-setting US\$2.783 billion in 2021, an increase of 29.1% from 2020.

Among these exports, metal-cutting machine tools accounted for US\$2.304 billion, an increase of 29.2%, and the export value of metal-forming machine tools was US\$479 million, also marking an increase of 29%.

About Taiwan Excellence

The symbol of Taiwan Excellence was established in 1992 by Taiwan's Ministry of Economic Affairs to recognize and promote the excellence of Taiwan's most innovative companies. Taiwan Excellence believes that innovation makes a difference in everyone's life.

Every year, Taiwan Excellence invites experts gather to judge and award innovative Taiwanese products based on the four categories of R&D, Design, Quality, and Marketing. Taiwan Excellence Award winning products range from high performance laptops to life-saving health management software and are promoted by the government in the international market.

Please visit www.taiwanexcellence.org for more information.
